To register,
call the Nebraska
Logistics Council at
402-476-7822 in
Lincoln, or e-mail
swilson@nebtrucking.com.

topic:

Peak Oil

Breaking the Myths of Energy Independence and Abundance

G.E. 'Rick' Wildrick will present an overview of national and global energy supply / demand balances, why fuel, commodity and food prices are soaring and what the future may hold in store for our economy. The talk will include how lack of governmental policy on energy issues have brought us to the current energy crisis and what can be done about it. Global competition for energy supplies and national energy resources will be brought into perspective in this one hour presentation.

Wildrick was educated as an Environmental Scientist at the University of Nebraska at Omaha and has spent the last thirty five years as a pioneer in promoting Energy Efficient Homebuilding and is an award winning Green Home builder. His soon to be released book covers world energy issues and their impacts on our personal and business lives.

Reservations not cancelled by noon the day prior to the event will be billed.
You also have the option to send someone in your place if you're unable to attend.
