¹ These numbers are derived from the Shipper's Export Declaration form, which does not directly ask the state of manufacture of exported goods. The location export numbers are "based on where the exporter of record is located. . . . this is determined using the ZIP Code of the exporter address given on the export record. Exporters often are intermediaries who export goods that were produced or purchased in a state different than their own." Origin of movement numbers are "based on the state from which the merchandise starts its journey to the port of export; i.e., the transportation origin. This information is reported by the exporter." The exporter location data series has been discontinued.
