

Nebraska Innovation Zone Commission Meeting

Infrastructure and Planning Committee

June 1, 2006

Members

Chuck Siergerson – Chair

Jack Slannard – Vice Chair

Sally McGuire – Recorder

Brenda Gunn

Jeff Quist

Dean Busing

It is important the Commission know what infrastructure is near and/or already available in the zone. We feel there is a number of reports that are available that has that information. We are interested in finding reports on:

- Utility Company
- Water
- Sewer
- Gas
- Electricity

For the next committee meeting we need information from

- MUD
- OPPD
- Papillion (water)
- Lincoln Gas & Water
- Aquila
- Cities that provide sewer and water

We may need to talk to the Civil Engineers that represent the cities.

We would also like the HDR Sewage Treatment study for Sarpy Co.

Planning

We need the zoning maps and the future land use maps for all land that abuts the I-80 roadway. Both city and county.

Chuck will call HDR to get their assistance in the project.

Other discussion – Hwy 6 is included in the Zone, it could be considered a frontage road as it run parallel to I80.

Communications

We need to know about the availability of broadband, DSL, and cable connections. That information will need to be gathered from:

- ❑ Qwest
- ❑ Cox
- ❑ Alltel
- ❑ AT&T
- ❑ Level 3
- ❑ (Lincoln?)
